

## **MIMIKO FLAGS OFF N3.9B EMURE ILE-OWO-IYERE ROAD DUALIZATION**

In continuation of the activities for the second anniversary of his administration, the Ondo State Governor, Dr Olusegun Mimiko on Monday (yesterday) flagged off the dualisation project of Owo Township Road.

The project is gulping the sum of N3.9 billion out of which N814 million has been paid to the contractor, CGC Construction Company Limited to facilitate the timely completion of the project

Speaking at the ceremony, the Governor told the people that the government commitment to the provision of infrastructure would be further demonstrated in the next two months with the rehabilitation of more township roads in Owo Local government area.

According to him, “the asphalt overlay of surface dressed roads is on-going on many of the Owo township streets while many had even been completed costing N537 million. The decision to dualise this township road is to resolve the chaotic vehicular traffic within the metropolis to bring relief to road users.

“We have reiterated our election promises to transform the infrastructural landscape of this state and this is a pointer to our resolve to extend this gesture to all towns of this state. Let me again assure you that we shall not relent in this effort as many more roads shall be constructed and upgraded to befitting status.

In his address, the Commissioner for Works, Engr. Gboye Adegbenro said the 14.8 kilometer Emure Ile-Iyere road would be completed in three phases. Mimiko also commissioned five other developmental projects in both Owo and Ose Local Government areas including town halls and local government legislative quarters, Owo amongst others
