

Ondo kingdom Gears for Rapid industrial Development

The efforts to step up the rapid industrialisation of Ondo Kingdom using the Ondo City Vision 2015 as a template would be the highlight of the series of events on Saturday 20th August, 2011 at a stakeholder's forum of the Ondo Kingdom Chambers of Commerce, Mines, Agriculture and Industry.

The Key targets of the Chambers include the siting of industries in Ondo City by providing vocational incentives and ceasing of entry conditions such as having access to well-serviced industrial parks, standard transport facilities and hotels.

According to the Secretary, Osemawe Committee on Ondo City Vision 2015, Chief Femi Ayodele, an Architect, the event would also involve assisting small and medium enterprises to access facilities from the Development Fund.

Another critical mission of the group is to source markets for products produced in the city and also encourage market demand driven production.

The Business Community is expected to actively participate in the discussions at the forum which holds at Osemawe of Ondo's Palace Hall at 11.00 a.m.
